

MARINE SEATS

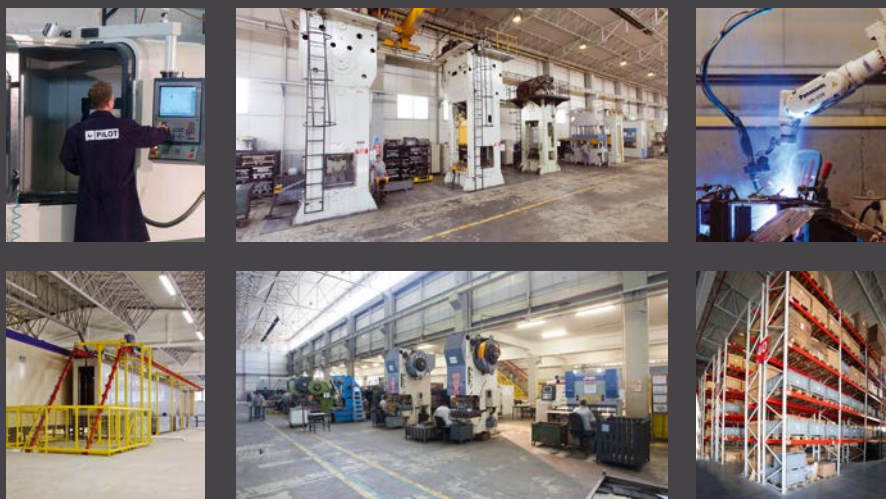

ABOUT US

Pilot was established in 1963 doing body work for busses. First seat production started in 1967 with driver seats for Mercedes Benz (Otomarsan - Turkey). Development of the seating industry saw Pilot starting to manufacture truck and construction equipment seats in 1977, followed by tractor and forklift seats in 1989, passenger seats in 1993 and marine seats in 2010.

Pilot manufactures in a modern, purpose built 12000 m2 factory and also has a separate R&D, tooling and testing plant. Both plants are located at the Industrial zone in Bursa, Turkey. All factories have ISO9001:2008 certification. Seats are designed and developed by our R & D Department, tooling is created and manufactured in our Tooling Department, using various design programmes.

Our R & D plant has CNC machines, wire EDM machines, various durability test machines, pull test machines as well as several other test equipment for various functions of the seats. This comprehensive and wholly integrated. This comprehensive and wholly integrated manufacturing and tooling capability allows Pilot to bring new projects to manufacturing very quickly and / or easily make changes on our standard ranges that may be requested by our customers as well as supplying high quality production consistently and in a timely fashion to our customers.

All our seats are extensively and continuously tested for performance and durability by our Quality Department and are certified according to applicable ISO and EU standards. Today, Pilot is a well-known brand in seating industry, exhibiting in all major international exhibitions and supplying to OEM and aftermarket customers in various sectors in more than 42 different countries worldwide.
