

# PRIMO® EVOLUTION

High-End Premium Seat  
with Active Seat Climate Control

**GRAMMER**

# TECHNICAL DATA

## PRIMO® EVOLUTION

With its comprehensive range of features and innovative low-frequency suspension, this top-of-the-line product boasts the best sitting and suspension comfort in its class. Active seat climate control removes body moisture. The integrated seat heating ensures a comfortable temperature. In addition to a pneumatic lumbar support, the Primo Evolution also features active adjustment to the operator's weight: a major advantage when vehicles are used by multiple drivers. The seat automatically responds to even the slightest difference in weight to ensure that vibrations are optimally attenuated.
