Air 554B

Air 714B/414B

- SIP to ISO 5353
- Dimensions at mid suspension stroke, lowest height adjustment and fully back on sliderail adjustment
- Indicative dimensions

KAB B-Series seats have enhanced comfort 3 point seat belts to protect the driver. The seat belts move with the driver as the suspension reacts to the normal road surface. This avoids belt chafing as when a conventional B-post mounted belt is used with a suspension seat. A T4B static seat is also now available.
